United States Treasury

Based on the ten largest issuers in the composite, listed alphabetically. Holdings subject to change and should not be considered as a recommendation to buy, sell or hold any security. Excludes cash and cash equivalents.

**STRATEGY HIGHLIGHTS**

The *Short Term Bond* strategy seeks to achieve above-benchmark returns consistently throughout market cycles with low volatility relative to the *ICE BofA 1-5 Year US Treasury & Agency Index*. Driven by a proprietary model, the strategy focuses on active duration management, sector selection and term structure positioning.

- Invests primarily in U.S. Treasuries, federal agencies and investment grade corporate bonds rated "A" and above
- Duration closely tracks index duration

**KEY ELEMENTS OF OUR APPROACH**

- Constrain portfolio duration relative to the benchmark to maintain the desired exposure to market risk
- Strategically allocate assets to market sectors and rotate sectors as values change
- Position securities along the yield curve to capture additional value as yield curves shift
- Select individual securities that we believe offer the greatest potential to maximize yield

**STRATEGY PROFILE**

- Inception date: 09/30/95
- Approx. 50-60 Security Holdings
- High Grade Minimum Rating A
- 5-15% Annual Turnover

The information herein is provided for informational purposes only. No investment decision should be made based solely on the information provided herein. All investment strategies have the potential for profit or loss. The strategy referenced may not be suitable for all investors. There is no guarantee that investment in this strategy will result in characteristics similar to those that appear in this presentation due to changes in economic conditions and other market factors. Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Minimum investment for an institutional account is \$2 million. Minimum investment varies depending on the managed account sponsor. Please call Chandler to verify amount. Fixed income investments are subject to interest, credit, and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

The ICE BofA 1-5 Year US Treasury & Agency Index tracks the performance of US dollar denominated US Treasury and nonsubordinated US agency debt issued in the US domestic market. Qualifying securities must have an investment grade rating (based on an average of Moody's, S&P and Fitch). Qualifying securities must have at least one year remaining term to final maturity and less than five years remaining term to final maturity, at least 18 months to maturity at time of issuance, a fixed coupon schedule, and a minimum amount outstanding of \$1 billion for sovereigns and \$250 million for agencies.
